

# Label the planets!

Label each planet using the word bank below

A diagram of the solar system for labeling. On the left is a large, smiling sun with the word "SUN" written on it. To its right are ten celestial bodies arranged in a line, each with a unique color and pattern. Above the first five bodies are five empty rectangular boxes with colored borders (yellow, light blue, red, green, and dark blue). Below the last five bodies are five empty rectangular boxes with colored borders (light blue, red, yellow, and dark blue). Arrows point from each box to a specific celestial body: the yellow box points to the first body, the light blue box to the second, the red box to the third, the green box to the sixth, the dark blue box to the seventh, the light blue box to the fourth, the red box to the fifth, the yellow box to the eighth, and the dark blue box to the ninth.
